

Application No. 10/812,518

AMENDMENTS TO THE SPECIFICATION:

Please replace the title with the following amended title:

A CORONA-GENERATING-CLEANING DEVICE FOR CLEANING A MOVING SURFACE HAVING A WIRE-COMPOSITE

Please replace paragraph [0011] with the following amended paragraph:

Briefly stated, and in accordance with the present invention, there is provided an apparatus for cleaning a moving surface having toner particles thereon, comprising: a housing defining an open ended chamber; means, disposed in the chamber of said housing with a portion thereof extending outwardly from the open end of the chamber of said housing into contact with the surface, for cleaning toner particles therefrom, said removed particles moving away from said cleaning means; means for lubricating said cleaning means, said lubricating means located downstream from said cleaning means, in a direction of motion of the surface, said lubricating means collecting and transporting toner particles from a center portion of said moving surface to ~~both end portion~~ both end portions of said moving surface; and an auger, located downstream from said cleaning means and said lubricating means, in the direction of motion of the surface, collecting the toner particles that escape from said lubricating means.
